SALITA

Salita offers an intimate place to welcome guests or enjoy a moment of quiet reflection.

Modular Planning Made Easy

The Salita collection provides a flexible system for creative space planning. One, two, and three-seat modules stand alone and can be joined together with corner, curved, table and chaise sections for a wide range of configurations. Each module comes with a set of durable, flexible nylon connectors that secure one seat frame to the next. The connectors require no tools to add or remove, giving users the opportunity to easily adapt a configuration. Additional connector sets are available to order.

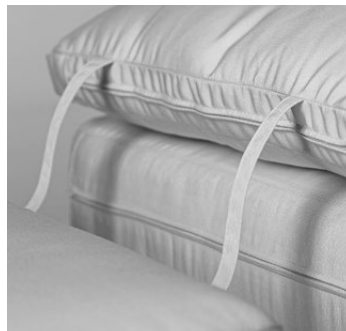

Seat-to-seat connection

Seat-to-table connection

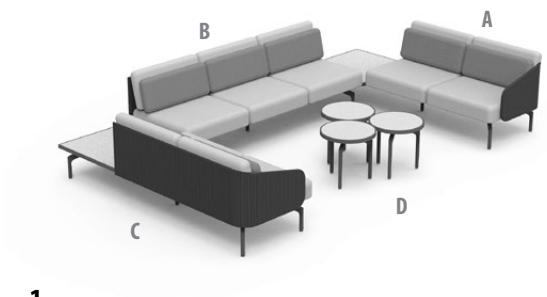

A Supportive Seat for Outdoor Gathering

Striking the balance between seated support and a plannable scale, Salita offers tailored comfort and durable outdoor performance. The contract-quality, high resilience foam is protected from the elements by a moisture-repellant layer that is both breathable and mold and mildew resistant. The removable upholstery covers are available in a large selection of high-performance fabrics. A fabric panel connects the seat and back as one easy-to-remove unit, which secures to the seat frame by sturdy loops with stainless steel snaps. The semi-detached accent pillow comes one per seat and features a soft, down-like fill for additional lumbar comfort. It stays in place by two hidden, stainless steel snaps between the seat and back cushions. Designers have the option to specify a different fabric on the accent pillow for visual interest.

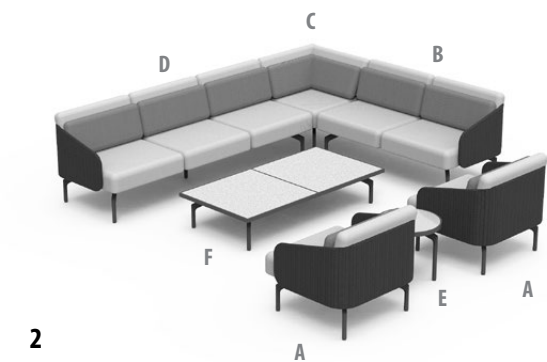

SALITA
